Representatives of Ocean Sports Development, Webber Wave Pools, and Sports Facilities Advisory to Speak at Surf Park Summit 2020

(Margate, FL) Anthony Brown II of Ocean Sports Development (OSD), Greg Webber of Webber Wave Pools, and Dev Pathik of Sports Facilities Advisory (SFA) have been invited to appear as keynote speakers at Surf Park Summit 2020, to be held in at the Scripps Seaside Forum in La Jolla, California, on March 31 and April 1. Presented by Surf Park Central and San Diego University's Center for Surf Research, the event features the most comprehensive lineup of surf park industry heavyweights ever assembled in one place.

Anthony Brown II, chairman of OSD, will cover practical surf pool applications and development of the National Surfing League™. Greg Webber, inventor of the patented Webber Wave Pool system, will be discussing wave generation technology. Dev Pathik, SFA's Founder and CEO, will focus his presentation on the market implications of surf pool technology.

OSD is the exclusive USA licensee of the patented Webber Wave Pools technology and trademark owner of the National Surfing League™ (NSL), with long-range plans to create a league of premier professional surfing competitions for men and women once enough surf pool locations are operational. In June of 2017 OSD aligned with SFA as their exclusive partner in the planning, financing, and development of all new surf pool projects.

Under Dev Pathik's leadership, SFA has become respected as the industry leader in strategy, program planning, and project finance; a position achieved through global brand presence and measurable impacts for communities. His expertise and thought leadership have been sought out by The Wall Street Journal, Forbes, Market-Watch, CNBC, NBC, The Aspen Institute Sports & Society, The National Association of Sports Commissions, The National Recreation and Parks Association, The Sports Business Journal, Sports Travel Magazine and many others.
